# ABCOM **BOS**

## RUN YOUR STORE SMARTER.

Abcom BOS is a next generation QSR management software solution that helps you manage the full spectrum of critical store functions from cash and deposit handling, sales tracking, inventory control, time and attendance to employee scheduling – all in one integrated package.

Abcom BOS is adaptable to your operational needs, scalable to any size store and designed to increase your cost efficiency, improve business automation, establish audit and loss reduction mechanisms and connect your POS to your store and above store reporting systems.

Built to meet the needs of the highly specialised QSR industry, Abcom BOS streamlines day to day store functions – increasing management capability and boosting productivity in everything you do.

Abcom BOS is the latest iteration of the smart, seamless QSR back office solution trusted by countless stores to run operations for over three decades

## TECH STACK INTEGRATION.

Abcom BOS interfaces directly to a growing list of third party solutions.

In addition to the POS, the Abcom LabourGuard Timeclock and the Abcom BOS Stocktaking App also feed data into the BOS as 'single truth' data points.

Abcom BOS utilises this data to provide key indicators and meaningful store reporting with above store processes feeding results to administration and Abcom Business Intelligence allowing consolidation with other stores owned by the same operator to improve business strategy and profitability.

With electronic transfer of orders to stock providers, automated updating of their deliveries into your inventory system and invoices posted directly to Abcom Accounting – we provide all the mechanisms to make your supply chain integration a breeze.

## FUTURE PROOF.

Abcom BOS is built using the global standard Microsoft® .NET® framework; a mature, robust platform that ensures Abcom BOS offers a long, productive life span; representing a low risk, long term software investment for your business.

All Abcom systems are built with proven security technology in an era of heightened data concerns. System interaction is account restricted and logged with all data using 128bit encryption.

All of this is backed by Abcom's professional store level support team based in Australia, providing prompt assistance at all levels to ensure continuity and consistent results.

Abcom is a global Quick Service Restaurant systems developer that for over three decades has delivered business management solutions to some of the world's largest and most well-known brands.

Our growth and success has been achieved through an unparalleled reputation for excellent products and industry leading support powered by a highly experienced team representing many decades of IT and real QSR business knowledge.

We continually invest in cutting edge systems development using best breed Microsoft technologies; improving existing product value and always looking to further meet the needs of our customers into the future.

Abcom is a wholly Australian owned and operated business that prides itself on being a dependable and critical part of our customer's success stories.
