

# ABCOM BOS APP

**Perform stocktaking on your mobile smart phone or tablet.  
Any place at any time.**

## PERFORM STOCKTAKES ON THE GO.

The process of stocktaking is a QSR reality, but it need not be a difficult one.

With the BOS app, you can quickly enter stock counts directly into your smart phone or tablet on the go. Upload a completed stocktake directly to your Abcom BOS. Say goodbye to the printing of multiple stocktake sheets and the subsequent manual data entry necessary. Just select the stocktake required and transfer it to and from your device in seconds.

Utilising the BYOD model (*Bring Your own Device*), Abcom BOS app will work on any compatible iOS or Android device. Specialised, expensive hardware is not required. Minimise the risk of a high cost company owned and purpose-built devices being mistreated or damaged.

Our BOS app avoids the potential limitations of net connectivity. Data is saved to the device itself. You can then upload your count later when within range of your internet connection.

## GET UP AND RUNNING, FAST

The Abcom BOS app is quick to set up. Once registered, the IOS or Android phone or tablet can then be used for the stocktaking process. If required you can quickly disable a device in Abcom BOS if a staff member leaves your employment.

There are no complicated user accounts and passwords. Create a unique PIN for any registered device and then use that PIN code for the required stocktake type in focus.

The app seamlessly and securely interfaces with the Abcom BOS Inventory system, using all your stock counting rules and item setups.
